

Electricians and Mates

We require site-based Electricians and Mates to work on several projects around the UK. These roles will be predominantly dayshift Monday-Friday. However, there may be an occasional need to cover weekends and potentially out of hours working for certain works. Therefore, a degree of flexibility is required.

Duties:

- Undertaking repair, renewal and installation works within your Electricians remit and work with associated trades.
- Ensure maintenance work is undertaken safely and in accordance with all technical standards.
- Communicate effectively with clients.
- Work safely and in compliance with Health & Safety and safeguarding requirements.
- Remain up to date with technical and legal requirements of skill area.
- Working in partnership with other operatives to complete installation and repairs, if required.
- Completing time sheets work sheets detailing work undertaken and materials used after each job undertaken.

Essential Criteria:

- You will hold a full UK diving licence.
- Qualified to at least, Electrical Installation 2360 Parts 1&2 or an NVQ Level 3 equivalent,
- BS7671 18th Edition Electrical Regulations,
- C&G 2391 Inspection, Testing, and Initial Verification or equivalent.
- Completed an Electrical Engineering apprenticeship.
- Knowledge of panel constructs, wiring and fault finding would be advantageous.
- Experience in the use of Microsoft Office programmes is also essential.

To apply for this job role please send your CV to info@electeksolutions.co.uk with the subject 'Electricians and Mates'
