

M&E Project Managers/Engineers

Due to our continued expansion and being awarded a major contract, we currently have several vacancies available for experienced M&E Project Managers/Engineers to join our team.

We require a site-based Project Manager to oversee a project in the Bradford area, for the delivery of all M&E services within the conversion of a large commercial building to residential apartments and commercial units. The project duration is expected to be 12 months. This will be predominantly dayshift Monday-Friday. However, there may be an occasional need to cover weekends and potentially out of hours working for certain works. Therefore, a degree of flexibility is required.

We have other roles based at our head offices in Burnopfield, assisting with the management of several national M&E contacts we are currently running. This role will require frequent travel to our client's sites based throughout the UK.

Duties:

- Plan & deliver multi-discipline projects to meet agreed timescales and commercial performance against agreed targets.
- Full control of all actions, methods & output of each project under his/her remit.
- Provision of the required tools and equipment for each discipline within the project team.
- Manage and control procurement of the project.
- Liaise and communicate with management, clients, project staff and site operatives.
- Manage decisions on the need and nature of major design changes.
- Ensure inspection of site installations at appropriate stages is relevant and recorded.
- Attend site meetings with the project teams and the client.
- Manage the control of all documentation within the project team, with external organisations and the Client.
- Manage Client instruction and approvals.
- Review and manage the recruitment, supervision and control of all staff and subcontractors.
- Ensure all quality procedures are in place and inspections / audits are in place and recorded.

Essential Criteria:

- Construction Site Management experience.
- Strong Electrical/Mechanical knowledge.
- Current SMSTS.
- Excellent management skills
- Excellent self-organisation skills and ability to organise others.
- Proficient in the use of Microsoft Office programmes such as Word, Excel, and PowerPoint.
- Priority management.
- Knowledge of UK building regulations.
- Ability to drive program.
- High levels of quality standards.
- Attention to H&S matters.
- Ability to handle multiple tasks.
- You will hold a full UK diving licence.
